EV Course Offerings at NW WA Electrical JATC

Introduction to Electric Vehicles -

(4hrs) (WA 4hr CEUs) *No prerequisite or text requirement*

This course will introduce Electric Vehicle Supply Equipment (EVSE) and its installation to the Electrician. Course reviews EVSE types and product lines as well NEC, NFPA 70E & OSHA Codes & Standards for proper installation. This Course is a prerequisite to EVITP Certification.

EVITP Phase 1 Certification -

(20hrs) (WA 12hr CEUs) *Prerequisite - Introduction to EV - no text requirement*

EVITP was established to provide the Electric Vehicle Industry with a certification to ensure the highest level of verifiable knowledge and technical understanding to support the sound, safe and successful growth of the EV market. With completion of the course and passing of a written exam students will receive EVITP Certification (must be a Journeyman Electrician or Administrator). The course will cover a broad scope of material from Electric Vehicle Installation methods, codes and standards to customer relations.

Please note PRE-REGISTRATION is required for all EV courses!

To Register for courses, complete a Continuing Education Registration Form available at: www.nwejatc.org. The form can be faxed directly to the NW WA Elect. JATC or attached to an email and sent to: theresa.sammons@nwejatc.org
